

Brad Jobe

<https://bradjobe.dev> | bradjobe.dev@gmail.com | Montreal, QC

Senior full stack developer (8+ years) shipping production systems in **Healthtech** and **AI**.

Work Experience

TELUS Health - RAPIDS - Senior Developer

Montreal, QC

Dec. 2021 - Present

- Senior developer on the patented [RAPIDS Mental Health Guidance](#) HL7 FHIR system.
- Lead developer on the [Ori Mental Health Chatbot](#) AI agent orchestration application.
- Automated production error tracking, alerting and linking every detected error to Jira.
- Maintained **99.6%** uptime in 2026 for **100+ clinicians** and **3000+ patients**.
- Built an LLM-judge eval workflow into our CI/CD, cutting regression issues by over **70%**.
- Owned Terraform-based multi-region deployments of **30+** Cloud Run services.
- Resolved runaway GCP spending issues, reducing overall costs by **40%** YoY 2025-2026.
- Automated bug fixes with sandboxed Claude Code agents on GCP, closing tickets **5x** faster.
- Mentored QA and junior developers, fostering a culture of quality and best practices.

CBC/Radio-Canada - Senior Developer

Toronto, ON

Nov. 2019 - Dec. 2021

- Core developer on the [CBC Listen](#) web app (React, Node API) **serving 5000+ DAUs**.
- Led migration of the site and API from Azure to OpenShift (AWS) in under two weeks.
- Implemented regional caching of web content to **decrease p99 latency by 65%**.
- Partnered with the CBC ML team to train and ship a podcast recommendations API.
- Migrated legacy Robot Framework tests to a new Cypress test suite.
- Tracked production bugs by implementing OpenTelemetry client-side monitoring.
- Built an [in-memory global search](#) to query all CBC Radio content in under **150 ms**.
- Implemented [Amplitude](#) Analytics to create user behaviour KPI reports.

allNovaScotia.com - Full Stack Developer

Halifax, NS

May 2018 - Nov. 2019

- Hired to take over the site's AWS project after the company's sole developer left.
- Developed and released a [React Native app](#) and the new [React/Next.js site](#).
- Tuned MySQL and added PHP OPcache, ending crashes during **6000+ user traffic spikes**.
- Cut AWS costs **60%** by rightsizing EC2 instances and removing idle resources.
- Added unit and E2E tests to legacy projects, catching bugs before they hit staging.
- Integrated AWS Elasticsearch to enable fast querying over **10+ GB** of text articles.

Education

Acadia University

Wolfville, NS - 2012 - 2017

Bachelor of Computer Science Co-op, specialization in Software Development

Technology
